

The diagram illustrates a road intersection with a central grey rectangular area representing the intersection zone. A vertical dashed line runs through the center, with a downward arrow on the left and an upward arrow on the right. The road is divided into four quadrants by this dashed line and a horizontal line passing through the center.

Top-Left Quadrant (Approaching from North):

- At 150,00 m: A triangular warning sign (yellow background, red border, black symbol of a vehicle falling from a height).
- At 100,00 m: A triangular warning sign (red border, white background, black symbol of a narrow road ahead) and a circular speed limit sign (red border, white background, black number 40).
- At 50,00 m: A circular speed limit sign (red border, white background, black number 40) and a circular sign (red border, white background, black symbol of a vehicle falling from a height).
- At 2,00 m: A rectangular speed limit sign (red border, white background, black number 40) and a triangular warning sign (yellow background, red border, black symbol of a vehicle falling from a height).

Top-Right Quadrant (Approaching from South):

- At 50,00 m: A circular speed limit sign (red border, white background, black number 40).
- At 0,00 m: A rectangular speed limit sign (red border, white background, black number 40) and a triangular warning sign (yellow background, red border, black symbol of a vehicle falling from a height).
- At 2,00 m: A rectangular speed limit sign (red border, white background, black number 40) and a triangular warning sign (yellow background, red border, black symbol of a vehicle falling from a height).

Bottom-Left Quadrant (Approaching from East):

- At 50,00 m: A circular speed limit sign (red border, white background, black number 40).
- At 0,00 m: A rectangular speed limit sign (red border, white background, black number 40) and a triangular warning sign (yellow background, red border, black symbol of a vehicle falling from a height).
- At 2,00 m: A rectangular speed limit sign (red border, white background, black number 40) and a triangular warning sign (yellow background, red border, black symbol of a vehicle falling from a height).

Bottom-Right Quadrant (Approaching from West):

- At 50,00 m: A circular speed limit sign (red border, white background, black number 40).
- At 100,00 m: A triangular warning sign (yellow background, red border, black symbol of a vehicle falling from a height) and a circular speed limit sign (red border, white background, black number 40).
- At 150,00 m: A triangular warning sign (yellow background, red border, black symbol of a vehicle falling from a height).
